

*BNF Tree
for Db1figure Top*

<component_datafile>

```
graph TD; A("<component_datafile>") --> B("<cluster_information>"); A --> C("<cluster_vertex>");
```

A diagram showing a BNF tree structure. The root node is an oval containing the text *<component_datafile>*. Two arrows point from the bottom of this oval to two child nodes below it. The left child node is an oval containing the text *<cluster_information>*, and the right child node is an oval containing the text *<cluster_vertex>*.

<cluster_information>

<cluster_vertex>
